Associated Plating Company is experienced in servicing the demanding needs of many end-markets.

Associated Plating Company, Inc. is focused on providing a value-added, engineering driven, precision metal finishing solution to the marketplace. Our business is structured to deliver high quality, quick turn, customer friendly precision metal finishing to customers at the most competitive price. The management team, with over 125 years of experience in precision metal finishing, employs continuous improvement tools and optimization theory to drive shop floor performance. The quality system at Associated Plating Company utilizes visual factory concepts and dedicated training sessions to achieve the highest quality output. We structure our manufacturing processes, systems, and equipment around velocity based metrics in order to be extremely flexible, thereby reducing total cycle time to meet your delivery requirements. Associated Plating Company's customer service and sales professionals are trained to respond quickly to customer requests and needs, which in turn drives our production-scheduling department.

Associated Plating Company is experienced in servicing the demanding needs of many end-markets.
